

SUPER LOW

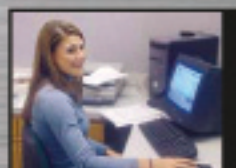

Features and Specifications

- 15^{3/8}" height with steel deck – 3/4" bolted-on safety-plate deck is standard, heavier deck plate is available
- 15" height with concrete deck
- Structural I-Beam design utilizes dual main girder beams with structural stringers for maximum weighbridge strength
- All steel is shot-blasted to commercial spec SSPC-6
- NEMA 4X Corrosion resistant junction boxes
- Up to 90,000# Concentrated Load Capacity
- Parallel link load cell mounting assembly enables the self-aligning weighbridge to return to its point of calibration
- End-wall bumper checking system limits motion to provide protection against wear and tear
- Surge voltage protection package
- High performance epoxy/polyurethane coating system
- 65,000# environmentally protected alloy load cells with stainless steel sheathed cable
- NTEP platform sizes available from 8' to 12' wide in any length
- Above ground or pit installation

Options and Accessories from B-TEK Scales

M2000D Digital Load Cell System
Protect your capital investment with superior lightning protection provided by digital technology.

Truck Management Systems
Unattended and attended systems allow for custom invoicing and data management.

Printers
Record weights on a variety of ticket and slip printers

Scoreboards
Display weight to drivers
Sight Rails
Increase safety with sight rails to guide drivers

Drip Pits
Cleaning grates minimize debris on scale and road surfaces

Galvanized Steel
All B-TEK scales are available with galvanized steel for superior resistance to corrosion
